ACHIEVE YOUR ADVERTISING GOALS MORE EFFICIENTLY

Big Idea

Advert.io helps small advertisers reach new customers more effectively through advertising, automating the digital advertising process. It automatically creates, tailors and distributes campaigns, based on the information collected from its customer's website. Advert.io's algorithm optimises return on investment in digital advertising by distributing ads on multiple platforms, such as social media, search engines and blog networks.

THE INDEPENDENT ANDROID APP STORE.

Big Idea

Aptoide is the game-changing alternative Android app store. With over 200 million users worldwide, over 6 billion downloads and 1 million apps, Aptoide gives a new meaning to the way we discover and install apps. Through social collaboration, tailored recommendations and the opportunity to create and share your own store, Aptoide is revolutionising app distribution. Aptoide gives developers, OEMs and telecommunication companies access to a fully customisable app store and a worldwide competitive revenue share model. With an ever-growing community and a solid number of partnerships, Aptoide is now on one of the leading players in the apps world.

MAKING DATA-DRIVEN DECISIONS TO REDUCE CYBER RISK WITH THE WORLD'S LEADING SECURITY RATINGS PLATFORM

Big Idea

BitSight is the most widely sought Security Ratings company and its mission is to change the way the world addresses cyber risk. Over 1,500 organisations are using the BitSight Security Ratings solution to continuously monitor cyber risk in their business ecosystem. Using an approach similar to credit ratings for financial risk, BitSight customers are able to gain insight into the security posture of third parties as well as their own organisation. BitSight Security Ratings are calculated on a scale of 250-900, with a higher rating indicating better security performance.

FAST AND EFFICIENT CONTENT DELIVERY IS THE KEY IN A DIGITALLY CONNECTED WORLD. CODAVEL IS THE KEY.

Big Idea

At Codavel, they believe in content delivery at maximum speed and efficiency – for any user, device, network or content. They want their customers to provide their mobile app users with the best experience they can, and that's only possible by tackling what's currently out of control: the network. The inherent instability of the wireless last mile, such as Wi-Fi, 3G, 4G or even the upcoming 5G, is killing the speed of mobile apps. That's why Codavel has created Bolina. Its SDK controls network instability end-to-end, ensuring significant speed improvements in all kinds of network connections – and considerably improving the end-user's experience.

DISCOVER THE BEST EVENTS IN YOUR CITY

Big Idea

Fever is an events and experiences technology startup focused on inspiring users and helping event organisers generate greater demand. The Fever mobile app and website reach and inspire over 12 million unique users per week in its key markets (London, New York, Paris and Madrid), allowing them to discover the best events in their city. With its recommendation algorithm, the app features personalised listings for each user, for everything from music festivals and theatre to fashion, restaurants and a host of other events. Based on its users' preferences and behavioral data analysis, Fever is able to reveal and predict untapped demand for events that aren't even available yet. The company has begun using data to create its own events – Fever ORIGINALS, driven by the interest of Fever users. Fever will also use funding to build up its Fever ORIGINALS offering in the cities in which it operates, including Lisbon.

WHEN TECHNOLOGY AND QUALITY MERGE

Big Idea

EPEDAL is a Portuguese company, founded in 1981, that manufactures metal components and subparts for the automotive industry. It aims to meet all of its customers, shareholders and employees' needs by prioritising the sector's critical factors: delivery times, quality and price. The company supplies components and subparts for seats, exhausts, refrigeration systems, chassis and bodywork, and uses the latest stamping, wire forming, automated soldering and assembly line technologies on the market. Certification of its quality assurance and environmental management system by BVQI (ISO/TS16949, ISO 14001 and ISO 18001) and by Volkswagen (VDA) attest to EPEDAL's ability to operate in this highly demanding market.

SMART LIVESTOCK MANAGER

Big Idea

Farmcontrol introduces IoT cloud software that integrates data from farm equipment and sensors with human inputs, which can be collected in real time, making it a value-added tool for agricultural producers. The cloud solution connects to a large number of devices with the possibility of processing automatic rules. By using reports and acting in a timely manner on the notifications received, the producer can evaluate and improve parameters such as environmental conditions, food, water consumption and energy costs, critical points to be economically more efficient and competitive in the global market, also ensuring compliance with environmental and animal welfare requirements. The software also guarantees in its production module an integral traceability solution for animal production lots.

FLAT SHOES THAT MAKE A BETTER WORLD FOR WOMAN

Big Idea

One day, a woman had a dream. Others joined her and Josefinas was created. Josefinas is a Portuguese brand inspired by a dream. In a country in crisis, where there was little room for dreams, making handmade shoes had a new name: Josefinas. In Portugal, there is something that has never died: the savoir faire of craftsmanship and the passion for an idea. "Never give up" has always been Josefinas' motto. The name Josefinas is in honour of the brand's co-founder Filipa Júlio's grandmother. The hope is that Josefinas' story will inspire the path of many other women, straight to making their dreams a reality, just as it inspires us every day!

GENETICALLY INFORMED MEDICINE

Big Idea

Genetics is still lagging behind within clinical practice, thus hindering the fulfillment of its full potential. This is mainly due to communication and understanding barriers between Genetic Labs, Health Units and Physicians that consequently generate an enormous gap and hinder the usage of genetic tests within clinical practice. Coimbra Genomics aims to fill that gap, as it believes in Genetic Intelligence as an important clinical decision supporting tool. To this end, it has developed Elsie – a platform and marketplace for genetic tests, which simplifies the entire user experience and management of genetic tests within clinical practice. By closing the gap, Elsie will foster the endogenization of genetics in daily clinical practice, with incredible economic, clinical and social benefits.

FOR A SAFER TOMORROW

Big Idea

Immunetep has developed an anti-bacterial immunotherapy based on the discovery of a virulence mechanism shared by a set of different pathogenic bacteria. It discovered that a single molecule (extracellular protein), which is excreted by the pathogenic bacteria, is able to completely shut down the host immune system, letting the bacteria thrive and causing severe infections. Thus, by neutralising this molecule it can induce protection. By addressing an extracellular virulence factor that is highly conserved in the different bacteria, the company's anti-bacterial immunotherapy elicits protective antibodies against all the serotypes of the referred bacterial pathogens. It will, thus, also prevent the emergence of strains which are not addressed by current vaccines and which only address structural epitopes.

IMMUNETEP

Big Idea

LiMM Therapeutics is a biopharmaceutical company harnessing the molecular crosstalk between neuronal and innate lymphoid cells (ILCs) within peripheral tissues. By decoding the language of the neuro-immune crosstalk, we are developing first-in-class therapeutic products – NRILs: neuronal reprogrammers of innate lymphocytes – to preserve health and treat inflammatory and metabolic diseases and cancer. We are bridging neural sensing and immunology discoveries to unlock therapeutic solutions for the benefit of patients.

LEVERAGING THE POWER OF DATA-DRIVEN STORYTELLING

Big Idea

Storyo is a free mobile app that automatically creates video stories from photos on a smartphone. The app uses a patented algorithm that creates a narrative using data from any number of photos and enriches it with contextual information from the internet, so that each video tells its own story. In 2013, Storymatik applied for a patent for its technology entitled "Systems and methods for automatic narrative creation". This technology is what drives Strips and Storyo and its ability to interpret a set of photos and create narratives automatically. The patent was granted in the United States by the United States Patent and Trademark Office.

TAKING LUXURY VACATION RENTALS TO A NEW LEVEL

Big Idea

Tripwix is a luxury travel brand for demanding customers. It operates as an online travel agency where all establishments are kept to the highest standards of curatorship. Homes are personally inspected by Tripwix interior designers, thus guaranteeing customer satisfaction. Short-term rentals have been on the rise, as have the demands of customers who are looking for unique family experiences, and currently represent a US\$57-billion market worldwide. Tripwix is currently operating in Portugal, Mexico, Spain, Italy and Turkey.

ACCELERATING YOUR REVENUE MANAGEMENT

Big Idea

Founded in 2015, XLR8 has designed its Revenue Management System, a software program used to predict daily, monthly and yearly occupation for hotels, with tools and reports that help optimise rates and the number of rooms available, while maximising revenue growth. It provides a clear picture of current and future sales, based on historical data and forecasts (using Artificial Intelligence), which hotels can then use to analyse market behaviour patterns and take timely action to improve their results in the short, medium and long term.
